PROFILE

Enthusiastic and detail-driven fourth-year CS student with a strong background in web development, Cloud Computing, game development, workflow automation and data science. Eager to apply my skills in practical settings. Proficient in English and Khmer.

PROJECTS

Car Analytics Application (Source code)

Description:

- This Car Analytics Application is a react-based project designed to provide detailed insights into various car brands, models, and their associated data. The application features interactive charts and an intuitive user interface to help users explore and analyze car data effectively. (website demo)

Movie App (Source code)

Description:

- A React-based web application that allows users to browse popular movies, search for specific titles, and mark their favorite movies. This project uses The Movie Database (TMDB) API to fetch movie data dynamically.
